

Science – Life-Stages of Humans

Concept – Living things are made of cells that work together to help each other live

Vocabulary

- **Gestation:** The process or time when pre-natal development takes place.
- **Pre-natal:** The stage of development before birth.
- **Adolescence:** The stage of development between childhood and adulthood.
- **Puberty:** The physical changes that occur between childhood and adulthood.
- **Adulthood:** The stage of development when a human is fully grown and mature.

Lesson 1 – Can I explain what gestation periods are for different animals, including humans?

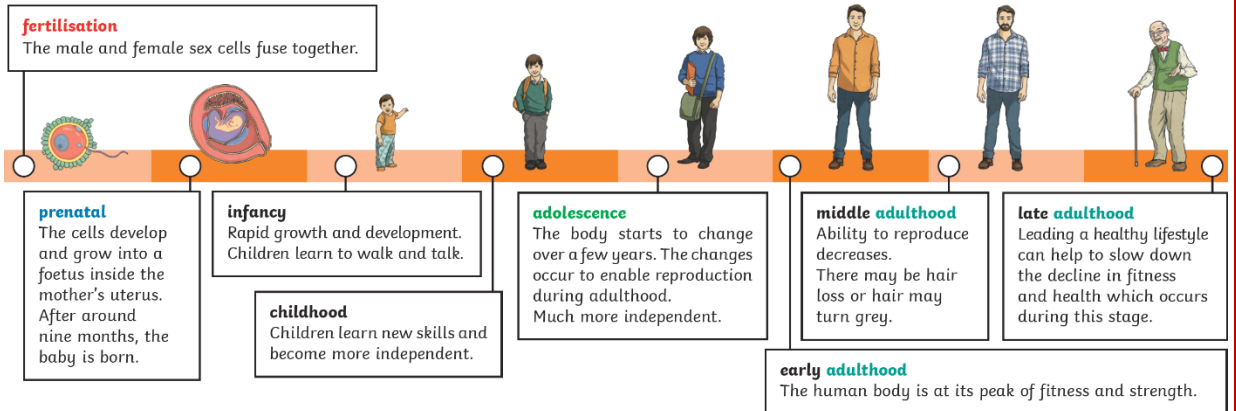

Lesson 2 – Can I describe the changes as humans develop from fertilisation to birth?

Lesson 3 – Can I explain how babies grow and develop into children?

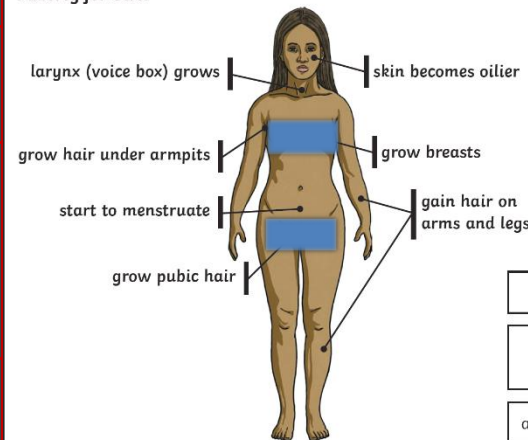

Lesson 4 – Can I describe and explain the main changes that occur during puberty?

Lesson 5 – Can I identify the changes that take place in late adulthood?

Lesson 6 – Can I describe the stages of human development?

Puberty for Girls

Puberty for Boys
