

# Geography – Cornwall Vs. California

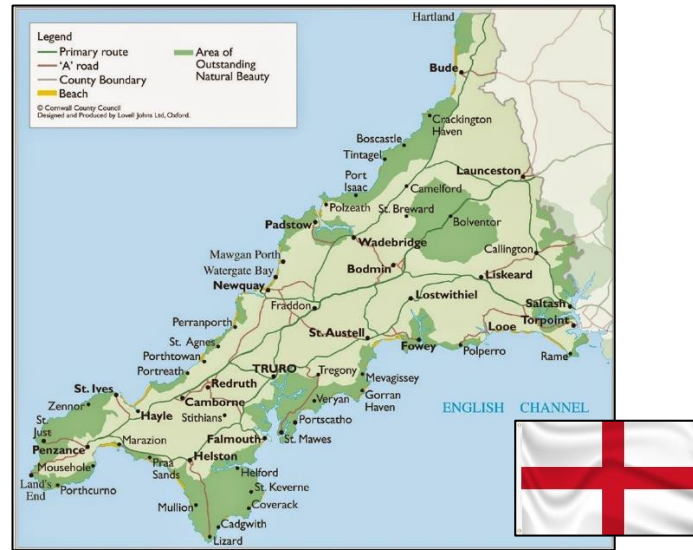

Human Geography – Understand how humans create places, how and why these change over time and understanding scales.

## Vocabulary

- Coastline – the land along the edge of the sea or ocean.
- Climate – the usual weather conditions in a particular place.
- Tourism – travel for pleasure and the industry connected to it.
- Agriculture – farming, including growing crops and raising animals.
- Landscape – the visible features of an area of land, including hills, rivers, and buildings.

## Cornwall

## Tourism

Tourism is when people travel to a particular destination to either relax and enjoy the different climate, explore new scenery or learn more about the culture in the area. Tourism is very good for the economy, and it helps bring lots of money to different destinations each year.

## California

## Agriculture and Industry

Agriculture is everything that goes into growing crops and raising animals, to provide food and materials that people can use and enjoy. An industry is a group of businesses that make or sell similar products or perform similar services.
